

Commercialization of Education

Hemlata, K.L.Sharma

Abstract: Education is the instrument that refines the person's personality and bring out the hidden knowledge inside it. Without education human beings are equal, because education alone is helpful in the creation of civilization and culture. Education makes superior to other creatures. The teacher works like a guide for the society. In society, the teacher gets the respect of the first class person

At present, the importance of education and teacher is increased, the more it has been used incorrectly, education is found in the market like anything else. Education has been commercialized. Responsible teacher and private academic institutions of educational commercialization can be considered. Teacher have made education a business, from which a poor learner has to be deprived of education. Such learners can not even complete their education initiation. Parents tend to private institutions due to lack of educational quality of government educational institutions. In this case, demand for private institutions increase. Here from the costume of the learners to the books, all the items have to be obtained from the institutions. It the condition of education is prominently seen. The better quality is seen where the better and the more grinding. It has been in the parents that the private institutions provide good quality.

In the modern times where the commercialization of education has been observed, in the government sector. Teachers are also professionalized by the administration. When the recruitment of three instructor teachers is made in the pay scale of a regular teachers such recruits also commonly gave rise to teachers commercialization by appointing teachers on contract. Where the administration gets its profits, it also has a broad impact on educational quality. The matter is of a teacher or commercialization of education has had a huge effect both in the areas.

Keywords – Education, commercialization, arbitrary fees, social reaction

INTRODUCTION

At present, education has been considered as the basic requirement. Education after roti, cloth and house has emerged as the first necessity. Education is the process of developing the person's underlying ability and its personality. It is only in education or it does not get easily by seeing and it effect both the society. When a person does not receive education. Then it is considered equivalent to the animal. To get education, private and government institutions have been made available in the society. Present consider private educational institution as good quality and are attracted to them. While government institution are also available but their considered to be of a low quality. This understanding is the parent's idol on the private institutions. This has increased demand for private institutions students of all classes can not get because education is expensive. That is the one who has the money can buy it from the knowledge institution of the education institute and is deprived of higher education.

RESULT

Our country's education system plays an important role in advancing the society. The important point of education is that it help in building a person's culture and makes humans superior to other creatures. This school which has reduced the life of people, has now taken the form of a business which has given good education to the capitalist house. Getting good education has become a dream for the common and middle class family. The point of view is that without money is not possible and non education is impossible, quality education has become a joke in a crowd of money. As a result, good education can be attained with someone who has wealth. It is not possible for ordinary and middle class families to get good education. About 70% of India's people come from the middle class. In such a situation, if education cannot be attained, then perhaps the foundation of Indian economy can be weakened.

CONCLUSION

At the present time education is a fundamental right as well as basic needs. Without education human society and nation cannot be imagined. Education develops the whole person. Student is received by the knowledge teacher. A teacher is a mirror of a society. Many time the student want to be like his teacher. In such a situation, if the teacher disagrees with his responsibilities, then the society and its student 's have a broader impact. If this teacher makes his responsibilities his business. then the future of the country can also be split with the youth.

At present, poor parents can not provide good education to this children due to the increase in education expenditure. Learners commit suicides an education fees. Some time parents earn money by doing erroneous task to fill the children's fees. Since the commercialization of education. Ordinary and middle class is desperate and frustrated. Approximately 70% people of the country are affected by commercialization. The talents of our country are frustrating due to commercialization. The person who has the some wealth as he has a class of society where he is very happy, while the second class is not successful even after struggling. Therefore all of these reasons education is only a business. With this type of education, the new youth of the country cannot become good citizens nor can they lead the country. It is big question. This kind of education can lead to problems of corruption in the country, such as defamation characters deficiency. Many problems of the country education system can be solved, if the administration made hard rules against educational commercialization.
